Preface

The South Carolina Statistical Abstract is a comprehensive, single-source reference for economic and demographic statistical data pertaining to the state. Data are compiled from in-house data bases and a variety of federal, state, local, and private sources. In addition to pertinent data for South Carolina, the Abstract presents comparative data for other southeastern states and the United States in many of the sections. Every effort is made to obtain the most up-to-date information possible. It is impossible to insure uniformity, but time periods are always stated on the tables.

Located in the Abstract are the latest statistics on factors impacting on the state's area and industrial development: manufacturing, importing, exporting, construction, housing, business and trade, employment, banking and finance, wages and prices, taxes, education, climate, parks and recreation, population, vital statistics, etc.

It is impossible to compile and publish the South Carolina Statistical Abstract without the continued cooperation and assistance of numerous persons in both public and private agencies who generously contributed much of the data contained in this volume.

We hope you find the Abstract useful and informative. Many persons have contributed suggestions which have been incorporated into this volume. We invite your comments and suggestions for future editions.

The State Data Center of the Division of Research and Statistical Services has prepared the 1986 Statistical Abstract using the latest information available. Census generated maps were produced by Lynn Shirley and Jeff Allen at the Social and Behavioral Sciences Lab of the University of South Carolina.

Information and assistance was provided by state and federal agencies and other organizations from around the state. A complete listing of these agencies and organizations is found in the Source Appendix.

The following statistical items give, for each state, the value of the item and the state's rank in comparison to other states. The primary source of the rankings is the 1986 edition of the Statistical Abstract of the United States, a U.S. Bureau of the Census publication which includes a selection of social, political, and economic data gathered from statistical publications and unpublished records of numerous governmental and private agencies. The rankings presented in this chapter are intended to serve as only a general reference as to where South Carolina stands in relation to other states on the various statistical items, and users are discouraged from drawing conclusions from the rankings without consulting the original sources for definitions and comparability of the data on which the rankings were developed. For information concerning these sources, contact the South Carolina State Data Center at 734-3780.

Glossary

REVENUES

General Fund - The State's largest primary revenue-generating fund group. It represents a composite of revenue sources derived from taxation, licenses, fees and all institutional and departmental revenues or collections, including income from the sale of commodities and services or other activities which provide funds for the fiscal operation of State government. The various revenues making up the General Fund are categorized into three source descriptions for accounting purposes in the Fiscal State Budget: Regular Sources, Miscellaneous Sources and Federal Revenue Sharing Funds.

Regular Sources - Revenues collected on an established basis from year to year. These include the Sales and Use Tax, Income Taxes, (individual and corporations), and an All Other segment comprised of twenty-eight additional tax, interest, assessment and/or license accounts.

Miscellaneous Sources - Revenue that is not as predictable as collections from Regular Sources. Generally, this classification incorporates: (1) those receipts which do not always recur in succeeding years, often labelled "windfall revenues;" (2) first-year collections of newly enacted taxes; and (3) one-time transfers of agency appropriations to the General Fund for specific purposes.

Revenue Sharing - Funds pursuant to the provisions of the State and Local Fiscal Assistance Act of 1972, as amended (Revenue Sharing Act). These include general Revenue Sharing Funds, Anti-Recession Aid funds, and interest received from investment of said accounts during the current fiscal year. "Windfall Revenue Sharing Funds" based on allotments and interest received by the State for the funding period of January 1, 1972 through June 30, 1973 were maintained in a separate account and reported as a special entry on the financial statements apart from the General Fund prior to fiscal year 1977-1978. Prior years have been adjusted to incorporate this fund.

Aid to Subdivisions - Distribution of State aid to counties and municipalities. Except for a reimbursement to counties for a homestead exemption (property tax), funds are allocated on a percentage basis from total collections of designated State taxes; the distribution formula is prescribed by statute and is subject to change. Types of funds: (1) Unrestricted--such monies may be used for the general operations of the county, city, or town; (2) Restricted--the expenditure of such monies is designated, by laws or regulations, to a particular project or program.

EXPENDITURES

General Fund (South Carolina) - The State expenditure data is limited to General Fund operations only and will differ from the consolidated expenditure statements outlined in other S.C. financial agency reports. Expenditures are classified by functional groups. The following appropriations are excluded: (1) Capital Outlay and Non-Recurring--funds utilized for capital improvements and other special projects, i.e., new construction, expansion and/or renovation of the physical plant; (2) All Federal appropriations except "recurring" Revenue Sharing appropriations; (3) Highway Funds--expenditures for the operation of the S.C. Department of Highways and Public Transportation.

State Government - This category refers to the governments of the 50 states which constitute the United States.

Local Government - The Bureau of the Census classifies local governments by five major types--county, municipality, township, school district and special district.

BANKING

Banks - Banks in this country are organized under the laws of both the States and the Federal Government. State-chartered banks are supervised by officials of the respective States. "National" banks are supervised by the Comptroller of the Currency.

Savings and Loan Associations - Unlike banks, are not engaged in deposit banking; primarily involve themselves in credit extension in the form of loans.

EDUCATION
Glossary

ELEMENTARY AND SECONDARY EDUCATION

Average Daily Attendance (ADA) - Is the aggregate number of days in attendance for a given period divided by the number of days the school is in session during this period.

Average Daily Membership (ADM) - Is the aggregate number of days in membership for a given period divided by the number of days the school is in session during this period.

Final Enrollment - Enrollment at beginning of the school year plus new enrollments from a non-public school or another state. Withdrawals are not subtracted from the enrollment figures.

Full-Time Equivalency (FTE) for Public School Staff - Is the amount of employed time required in a less than full-time position expressed in proportion to that required in a full-time position with "1" representing one full-time position. The total FTE is derived by dividing the amount of employed time required in a corresponding full-time position.

Schools - The National Center for Education Statistics (NCES) defines a school as a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant, as is the case when the elementary programs are housed in the same school plant.

Regular schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools. Public schools are schools controlled and supported by local, State or Federal governmental agencies; private or non-public schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Bureau of the Census defines elementary schools as including grades 1 through 8; high schools as including grades 9 through 12; and colleges as including junior or community colleges, regular 4-year colleges, and graduate or professional schools.

School Year - Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year, which includes 180 days for students and 185 days for staff. Generally, the school year begins in August and ends the first week in June. Statistics concerning finances are for a 12-month period beginning July 1.

HIGHER EDUCATION

Bachelor's Degree - Requires successful completion of at least four, but nor more than five, years of academic work.

Doctor's Degree - Includes such degrees as Doctor of Education, Doctor of Juridical Science (S.J.D.), Doctor of Philosophy in any field.

First Professional Degree - Signifies the completion of the academic requirements for a selected profession, which is based on an educational program requiring at least two academic years of previous college work for entrance and which requires a total of at least six academic years of college work for completion. Examples of first professional degrees are the Doctor of Jurisprudence (J.D.) and Bachelor of Laws (LL.B.), Doctor of Dental Surgery (D.D.S.) and Doctor of Medicine (M.D.) degrees.

Master's Degree - Is customarily granted upon successful completion of one (sometimes two) academic years of work beyond the bachelor's degree.

Full-time Equivalency (FTE) for Public School Staff - Is the amount of employed time required in a less than full-time position expressed in proportion to that required in a full-time position with "1" representing one full-time position. The total FTE is derived by dividing the amount of employed time required in the less than full-time position by the amount of employed time required in a corresponding full-time position.

Technical Education - Programs designed to prepare individuals for employment. Completion of a two-year curriculum leads to an Associate in Applied Science degree.

Unduplicated Headcount - The number of students enrolled in each listed program. A student is counted in only one curriculum. The extension totals are also unduplicated headcount. Although a student in extension may be counted in each program, he is counted only once in the total.

Vocational Education - One-year programs designed to prepare an individual for employment in a specific occupation; normal completion time required is four quarters.

GLOSSARY

Labor Force - All persons classified in the civilian labor force plus members of the Armed Forces (persons on active duty with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard).

Civilian Labor Force - All civilians who are classified as employed or unemployed. (Excludes military personnel.)

Covered Employment - Persons employed by firms covered by the S. C. Employment Security Law. This is approximately [illegible] of nonagricultural employment, and excludes nonprofit organizations employing four or less people and those [illegible].

Nonagricultural Employment - [illegible] paid wage and salary workers who are employed during the week that includes the twelfth of the month. Not included are Armed Forces personnel, unpaid family workers, proprietors, self-employed persons, and workers in private households.

Unemployment - Persons are classified as unemployed if they were civilians 16 years old and over and (a) were neither "at work" nor "with a job but not at work," (b) were looking for work, and (c) were available to accept a job.

Unemployment Rate - Total number of unemployed people as a percent of the civilian labor force.

Equal Employment Opportunity Special File - The Equal Employment Opportunity (EEO) Special File was produced by the Bureau of the Census to help meet the needs of both government and industry for more timely data than other detailed census data products from the 1980 Census of Population in planning EEO/Affirmative Action programs. Census figures on number of workers by occupation have generally been accepted as estimates for the number of workers who are "skilled". The number of "available skilled workers" is often needed for affirmative action plans or other EEO-related activities. The file [illegible] by furnishing counts of people in specific occupations.

1/: The labor force data in this table are adjusted to the Current Population Survey Benchmark and represent employment and unemployment by place of residence. These data are not comparable to place-of-work data published in other series. Workers involved in labor disputes are included among the employed. Total employment also includes agricultural workers and nonagricultural self-employed, unpaid family, and domestic workers.

2/: The Rock Hill MSA is now part of the Charlotte-Gastonia-Rock Hill, NC-SC MSA, which includes all of York County, so York County statistics may be used.

GOVERNMENT & POLITICS

Glossary

Governmental Units - A government is an organized entity which governmental character is evidenced by popular election of the officials or their appointment by public officials, a high degree of public accountability, and the power to raise revenue to provide authorized services. In addition, a governmental unit must have sufficient discretion in the management of its own affairs to distinguish it from the administrative structure of any other governmental unit.

Municipality - A municipality is a political subdivision within which a municipal corporation has been established to provide general local government services for a specific population concentration in a defined area.

Special District - Special districts are local governments which are created to provide specific services that are not being supplied by other governments. These governmental units are known by a variety of titles including districts, authorities, boards, and commissions. A majority of special districts are established to perform a single function, but some have been given authority to provide several, usually related, kinds of services.

HEALTH & PUBLIC WELFARE

Glossary

Aid to Families with Dependent Children (AFDC) - Financial assistance available to families with children who are deprived of parental care or support due to the absence or incapacity of one or both parents. Payments are based on the differences between income available to the family and the total allowance established under the Consolidated Standard of Need for food, clothing, shelter, utilities, household furnishings, equipment and supplies, personal expenses, medicine (other than prescription drugs), certain school fees, and transportation costs for the members in the budget unit.

Food Stamp Program - A federal, state and local program designed to provide individuals meeting certain income eligibility standards set by the federal government with coupons for food through purchase or at a reduction from their assistance payment. The purchase price of the coupons is less than the dollar value of the goods they can purchase.

Medicaid - A program, jointly funded by the federal government and the states, that provides medical aid for people who are unable to finance their own medical expenses. There are two categories of services under Medicaid: Mandatory Services, which must be made available to all categorical clients; and Optional Services, over which a state has discretion. There are 32 Optional Services from which a state may select any or all of the services. South Carolina's Medicaid Program covers 14 Optional Services.

Medicare - A federal hospital and medical insurance protection plan enacted in 1965 under the Social Security program. The program was designed to cover persons 65 and over and has been expanded to include persons under 65 who have been entitled to disability checks for 2 or more consecutive years and persons with permanent kidney failure who need dialysis or kidney transplants.

Social Security - A U.S. government program designed to provide continuing income when the individual or family earnings are reduced or stopped because of retirement, disability or death. The program was established in 1935 covering only the worker at retirement but has been gradually extended to include provisions for old age and survivors insurance, contributions to state unemployment insurance, and old age assistance.

Social Services Block Grant (SSBG) Program - A primary source of federal funding for the state's social service programs. In administering the SSBG Program, the state has the flexibility, within broad federal guidelines, to develop social service programs reflective of the state's priorities and concerns. During federal fiscal year 1986, the SSBG Program in South Carolina consisted of the following services: Adoption; Child Development; Children, Youth and Family Counseling; Day Care for Adults; Developmental Services for Handicapped and Disabled Children; Home Delivered and Congregate Meals; Homemaker Services; Protective Services for Adults; Social Support Services for Adults; Special Services to Handicapped and Disabled Adults; Specialized Residential Treatment for Children; Transportation; Alternate Placement and Management for Adults; Community-Based Counseling for Adults; Family Centered Services; Family Management Counseling; Home Evaluation and Supervision; Foster Care Services; Protective Services for Children; Socialization and Developmental Services for Children; Special Services for Unmarried Mothers; and Training.

Vocational Rehabilitation Services - A state and federal program designed to help those with mental or physical disabilities and those with handicaps to become more employable and get jobs. Services include eligibility determination, designing vocational rehabilitation programs, placing clients in jobs, and follow-up programs after employment.

INCOME

Glossary

Personal Income - The Bureau of Economic Analysis defines Personal Income as the income received by, or on behalf of, all residents of an area from all sources. It is the sum of wage and salary disbursements, other labor income, proprietors' income, rental income of persons, personal dividend income, personal interest income, and transfer of payments, less personal contributions for social insurance. Although most of the income is in monetary form, there are important nonmonetary inclusions--chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms. Not only individuals, but non-profit institutions, private trust funds, and private health and welfare funds are classed as "persons."

Real Personal Income - Total personal income after adjusting for inflation.

Implicit Price Deflator - An index used to measure personal consumption expenditures based on changes in prices of goods and services.

Money Income - Money Income, as reported by the Bureau of the Census, differs from Personal Income in that it is measured before the deduction of personal contributions for social insurance, and does not include imputed income, lump sum payments, and income received by quasi-individuals. Money income does not include income from private persions and annuities, and interpersonal transfers such as child support payments. Money Income estimates are usually lower than Personal Income estimates.

Family Income - Income of all members 15 years old and over in a family, summed and treated as a single amount.

Household Income - Includes the income of the householder and all other persons 15 years and over in the household, whether related to the householder or not. Since many households consist of one person, average household income is usually less than average family income.

Median Income - The amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median. For families, median income is based on the distribution of the total number of units including those with no income. The median for persons is based on persons with income.

Per Capita Income - The mean income computed for every individual, man, woman, and child (and quasi-individuals, in the case of Per Capita Personal Income) in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

Poverty - Poverty statistics are based on a definition originated by the Social Security Administration in 1964 and subsequently modified by Federal interagency committees in 1969 and 1980. Poverty thresholds are revised annually to allow for changes in the cost of living as reflected in the Consumer Price Index. The average poverty threshold for a family of four persons was $7,412 in 1979.

Persons for Whom Poverty Status is Determined - Poverty status is determined for all persons except inmates of institutions, persons in military group quarters and in college dormitories, and unrelated individuals under 15 years old.

Table includes places incorporated since January 1, 1980, and reflects some annexations and consolidations that have occurred since that date.

Bureau of the Census per capita income estimates are based on Money Income, while Bureau of Economic Analysis estimates are based on Personal Income (see Glossary for definitions). Therefore, comparisons between the Bureau of the Census estimates in this table and the Bureau of Economic Analysis estimates presented in other tables should be made with caution.

LAW ENFORCEMENT, COURTS, CRIME, & CORRECTIONS

Glossary

Aggravated Assault - An unlawful attack by one person upon another for the purpose of inflicting severe bodily injury.

Burglary - The unlawful entry of a structure to commit a felony or theft, even though no force was used to gain entry.

Crime Index - The Crime Index is used as a basic measure of crime. The crimes were selected for use as an index on the basis of their serious nature, their frequency of occurrence, and the reliability of reporting from citizens to law enforcement agencies. The offenses of murder, rape, robbery, and aggravated assault are categorized as violent crimes. Offenses of breaking or entering, larceny, and motor vehicle theft are categorized as nonviolent crimes. The Crime Index is the total of these offenses that come to the attention of law enforcement agencies.

Crime Rate - The Crime Rate indicates the number of Index Crimes per unit of population, generally per 10,000.

Juvenile - For purposes of juvenile jurisdiction of the Family Courts, a juvenile or "child" is defined as being, with two exceptions, one who has not reached his or her eighteenth birthday and is not married, emancipated, or a member of the armed services of the United States. The exceptions are where a person has committed, or is alleged to have committed, a criminal offense, including violations of motor vehicle laws or has violated the conditions of probation previously ordered in a court proceeding. For these latter situations, the statutes provide that a juvenile or child is one who has not reached his or her seventeenth birthday.

Larceny - The unlawful taking or stealing of property or articles of value without the use of force, violence or fraud.

Pardon - Remittance of the remainder of a sentence; reserved to the Governor by the State Constitution.

Parole - Release from prison before completion of sentence by the Parole Commission subject to specified conditions, usually including supervision by an appointed authority and subject to revocation and imprisonment if the conditions are breached.

Probation - Suspension of an actual prison sentence by a trial judge, subject to specified conditions, usually including supervision by an appointed authority and subject to revocation and imprisonment if the conditions are breached.

Robbery - Occurs in the presence of the victim to obtain property or a thing of value from a person by use of force or threat of force.

Youthful Offender Act (YOA) - The Youthful Offender Act provides for indeterminate sentencing of offenders between the ages of 17 and 21, extended to 25 with offender consent. The Act allows the court to sentence a youthful offender indefinitely to the custody of the South Carolina Department of Corrections. The period of such custody, however, will not exceed six years.

POPULATION

Glossary

Census Designated Place - These are densely settled population centers without legally defined corporate limits or any other corporate powers or functions. Each has a definite residential nucleus. Boundaries are drawn by the Census Bureau, in cooperation with State and local agencies to include, insofar as possible, all the closely settled areas. The term "place" as used by the Census Bureau, refers to a concentration of population, regardless of the existence of legally prescribed limits, powers or functions.

Incorporated Places - These are political units incorporated as cities and towns. There is a concentration of population with legally defined boundaries and legally constituted governmental functions.

Race - Information on race was obtained through self-identification; therefore, the data represent self-classification by people according to the race with which they identify themselves.

Rural Population - Population not classified as urban constitutes the rural population.

Spanish Origin - Persons of Spanish origin or descent are those who classified themselves in one of the specific Spanish origin categories listed on the questionnaire -- Mexican, Puerto Rican, or Cuban -- as well as those who indicated that they were of other Spanish/Hispanic origin. Persons of Spanish origin may be of any race.

Urban-Rural Residence - The determination of urban-rural residence is made after census results have been tabulated. Geographic areas are classified as urban or rural on the basis of their population size and/or density at the time of the census.

Urban Population - All persons residing in areas determined to be urbanized areas or in places of 2,500 or more outside urbanized areas.

Urbanized Areas - These areas are defined by each decennial census and are composed of an incorporated place and surrounding densely settled areas that together have a combined population of at least 50,000. There is no minimum size for the incorporated place that forms the central city of the area. The boundaries of Urbanized Areas do not generally conform to county boundaries.

WILDLIFE MANAGEMENT AREA LANDS

Within the 18 counties of Game Zones I, II, and IV (comprised of the Central, Western and Mountain Hunt Units), the S.C. General Assembly has granted to the S.C. Wildlife and Marine Resources Department Executive Director authority to set regulations, seasons, and bag limits. Deer and turkey on all lands, both public and private, within these 18 counties may be hunted only within the hunt unit boundary lines. WMA regulations apply to all lands within the boundary, both public and private.

LANDOWNER PREMISSION REQUIRED

Possession of a hunting license and a management area permit does not give the holder the right to use private lands. Lands inside the hunt unit boundaries, but not marked by U.S. Forest Service or Wildlife Management Area signs, are considered posted as private property. Permission from the landowner must be obtained prior to entering these lands. Persons not obtaining landowner permission may be charged with trespassing and receive a fine, jail sentence, or both.

VITAL STATISTICS

Glossary

Live Birth - The complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or any definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

Death - The permanent disappearance of any evidence of life at any time after live birth.

Infant Death - Death of a live born infant under one year of age.

Residence Allocation - Vital events in these tables are allocated to the place of residence (county) regardless of the place of occurrence. In the case of a birth, residence is the usual residence of the mother. Deaths are allocated to the residence of the deceased.

SOURCE APPENDIX

Guide to Sources of Statistics

The South Carolina Statistical Abstract is an abstract. It presents as much statistical information as possible in tabular form, but it is also a guidebook to the sources from which the statistics have been taken. In almost every instance the original source has additional data or perhaps more recent information, by the time this publication reaches the user. Most of the sources are as close as the telephone or the nearest library.

State Sources—Most of the State publications are available free of charge, or for a nominal fee, from the agency or group issuing them. The State has a system of depository libraries operated by the State Library. All State agency publications are supposed to be on file in depository [illegible] and the State Library.

Federal Sources—Some Federal reports are available without charge from the agency which issues the information, but most Federal publications must be purchased from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402 (phone 202/783-3238). Publications purchased from the GPO must be paid for in advance. The Statistical Abstract of the United States is similar in concept to the South Carolina Statistical Abstract. [illegible] nation, its regions, its states and selected locales.

Private Sources—[illegible] section of the Abstract.
